

## *The difference between technology and science*

*Ian Quallenberg Menkes\**

**Abstract:**

*This essay deals with the conceptual distinction between science and technology. Two classical and predominant answers given to such problem are analyzed and criticized. The idea that there is a gradual difference between science and technology which is determined by the restrictive connection between the aim and the scope of the investigation is explained and discussed.*

**Key words:** *Science, Technology, epistemology, methodology.*
